Technologies:

- JavaScript
- React.js
- CSS

Wolff Design

Full Stack Web Developer

February 2014 - June 2018 (4 years 5 months)

1. Create dynamic websites with an admin panel using WordPress and React.js
2. Create web applications in Node.js, PHP and React.js
3. Optimise workflow of web projects
4. Gather requirements from clients
5. Prepare quotes for web projects

Achievements:

1. A survey and survey report system for Volvo Penta

Programmer for the web application commissioned by Volvo Group Australia, designed and developed at Wolff Design. This web application is developed to allow Volvo Penta dealers to create post-service surveys for their customers. The customers are able to complete their surveys online. The managers are able to read reports based on customers' submitted survey results.

This web application is built in Laravel + React.js + Chart.js

2. Drivetime Radio

Programmer for the new audio listening online platform commissioned by Drivetime Radio, designed and developed at Wolff Design. This website allows healthcare professionals to listen to educational audio interviews on their mobile devices and computers.

This website is built in WordPress + jQuery

URL:

<https://www.drivetimeradio.com.au/>

3. AFCC

Lead programmer for the website commissioned by Australian Federation of Civil Celebrants, designed and developed at Wolff Design. This website has a member portal for each member and it also has a forum which allows all members to have online discussions.

This website is built in WordPress + jQuery

URL:

<https://www.afcc.com.au/>

WCP Digital
